Art Unit 1632

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address THE REPLY FILED Oct 17, 2002 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid the abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. THE PERIOD FOR REPLY [check only a) or b)] a) The period for reply expires months from the mailing date of the final rejection. b) X The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). 1. 🗆 . Appellant's Brief must be filed within the period set forth in A Notice of Appeal was filed on 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal. 2. X The proposed amendment(s) will not be entered because: (a) X they raise new issues that would require further consideration and/or search (see NOTE below); (b) ☐ they raise the issue of new matter (see NOTE below); (c) X they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or (d) X they present additional claims without canceling a corresponding number of finally rejected claims. NOTE: The addition of teh limitation regarding the E3 region would require new consideration for potential double-patenting. 3. Applicant's reply has overcome the following rejection(s): The double-pating rejection over US 5,851,806 Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s). 5. X The a) affidavit, b) affidavit, b) something exhibit, or c) affidavit, b) affidavit, b application in condition for allowance because: See MPEP 804, section II.B.1 in its discussion of In re Vogel. The status of the claim(s) is (or will be) as follows: Claim(s) allowed: none Claim(s) objected to: none Claim(s) rejected: 44 and 48 Claim(s) withdrawn from consideration: 8. Advisory Action

As indicated in MPEP 804, the portions of the specification of the co-pending application or patent that support its claims may be used to determine whether the instant claims define an obvious variant of the subject matter claimed in the co-pending application or patent. In the rejections here, the claims are directed to the same disclosed embodiments as the claims of the co-pending application and patent. Furthermore, the claims of the '106 patent and '797 application recite "one or more gene functions" of the E4 region. Clearly all gene functions of the E4 region are included by this limitation, and therefore obvious.

Since the provisional rejections are not the only remaining issues, they will not be withdrawn at this time.
